CS201 MIDTERM PAST PAPER SCREENSHOT

Que	stion No : 1 of 26
Wh	ich one of the symbol is used to represent a decision in a flow chart ?
Ansv	wer (Please select your correct option)
c	0
c	Correct
c	
c	

	k No

Que	stion No : 2 of 26	
In I	Flow Chart, flow of control is represented by	
Ansv	wer (Please select your correct option)	
c	Rectangle	
c	Circle	ent
c	Diamond Diamond	Circ
0	Arrow	
	<u>correct</u>	

		Ŀ NI	

Que	stion No : 3 of 26	
The	ere can be 'default' statement(s) in any switch structure .	
Ansv	wer (Please select your correct option)	
О	1	
c	<u>correct</u>	nent
C	parei	
С	n	

	k No

Que	stion No : 4 of 26	
The	condition in loop should be a(n)	
Ansv	ver (Please select your correct option)	
С	Constant Expression	
С	Boolean Expression	t
С	Primary Expression	
0	Arithmatic Expression	
	correct	

Question No: 5 of 26

How many nested loops would be required to manipulate n-dimensional array?

Question No: 6 of 26

Which of the following is not an example of int data type?

	k No

Que	stion No : 7 of 26	
We	should use	for clarity and to force the order of evaluation in an expression.
Ansv	wer (Please select you	correct option)
O	Brackets []	
O	parenthesis ()	correct
О	curly braces ()	parei
O	quotation marks " "	

Question No: 8 of 26

Which of the following is the starting index of an array in C++?

Ques	Question No: 9 of 26		
The	e statement x += y can be interpreted as		
Ansv	ver (Please select your correct option)		
C	Adding the value of the x to the value of the y and storing the result in x		
С	Adding the value of the y to the value of the x, store the result in y		
c	Adding the value of the x to the value of the x; store the result in x		
c	Adding the value of the y to the value of the y; store the result in x		

Question No: 10 of 26

Given a 2D array of integers, what would be the correct way of assigning the value 5 to the element at second row and third coloum?

Answer (Please select your correct option)

m[2][3] = 5;

correct

m[3][2] = 5;

m[1][2] = 5;

m[2][3] = '5';

	ay is a data structure that stores
Ansv	wer (Please select your correct option)
0	Memory addresses
0	Variables COFFECT
c	Data type
C	Data

	mark	

Ques	stion No : 12 of 26	
A p	rogram statement that invokes a function is called	
Ansv	wer (Please select your correct option)	
O	function declaration	
c	function call COFFECT	1
c	function definition	
0	function prototype	

ove V		k No	

Que	stion No : 13 of 26
Ifa	function has been declared but not defined before its function call then it is termed as
Ansv	wer (Please select your correct option)
0	logical error
С	syntax error
С	run time error
0	program time error

Que	stion No : 14 of 26	
The	Compiler of C language is written inlanguage.	
Ansv	wer (Please select your correct option)	
c	JAVA	
c	BASIC	ont
С	FORTRON DOTTEL	51 10
С	correct	

Que	estion No : 15 of 26
То	convert the value of one type into another type using built-in functions, we include header file.
Ans	wer (Please select your correct option)
c	conio.h
c	stdlib.h COFFECT
c	iostream.h
0	string h

Question No : 16 of 26

Which one of the below functions is not included in ctype.h header file?

isdigit(int c))				
isxdigit(int	c)			1 - 1000	
tolower(int	c)	p	dte	HOH HE	51
getdigit(int	c)				

Remo	re V		k No	

Que	stion No : 17 of 26
Wh	ich function is used to locate the first occurance of a character in any string ?
Ansv	wer (Please select your correct option)
c	strchr()
c	strstr()
c	strtok() DCTEE
c	strlen() CONTRECT

	mark	

Ques	tion No : 18 of 26
The	function write() takesas parameter(s).
Ansv	ver (Please select your correct option)
c	String of pointer type
C	String of variable lengths, no. of bytes to be read and flags
С	Pointer array of characters and a delimiter
C	String and no. of bytes to be written

	rk No	

es	tion No : 19 of 26
	is the pointer which determines the position in a file from where the next read operation occurs.
SW	ver (Please select your correct option) put
	seek
	get patelemen
	tell

Question No: 20 of 26

Given a two dimensional array of integers, what would be the correct way of assigning the value 6 to the element at third row and fourth column?

Answer (Please select your correct option)

array[2][3]=6;

array[3][4]=6;

correct

array[2][4]=6;

array[4][3]=6;

2 marks

C

Question No : 21 of 26

Write the syntax for calling a string manipulation function which compares the first 5 characters of an array "name" with the string "asdf".

2 marks

Question No: 22 of 26

What will be the value of x after the execution of the following code segment?

int x = 10; int y = 30; int *xptr = &x; x = *xptr + 10;

Question No : 23 of 26 Marks: 3 (Budgeted Time 6 Min)

Assume that you write a program to read the data from a text file. You have two options to do it, either reading the data character by character or reading multiple lines of data at a time. Which option do you think is more better and Why?

Question No : 24 of 26 Marks: 3 (Budgeted Time 6 Min)

Consider that an integer pointer xptr contains the memory address 0x22ff50. Now if the statement xptr +=4; is executed, how many bytes the pointer xptr will jump in the memory and what will be the new address of the xptr?

Question No : 25 of 26 Marks: 5 (

Write a program which takes a string from the user and searches it within another string "This is my Pakistan".

For example, if the user enters the string "my" then after search, the program should display the message "String found" otherwise it should display the message "string not found".

Question No: 26 of 26

Detect and correct compile time error(s) in the following code.

Hints: The following code print numbers from 1 to 100.

```
void main()
```

Question No: 26 of 26

```
int counter;
float *ptr;

for ( counter = 1; counter <= 100; counter++)
{
   ptr = counter;</pre>
```

Question No: 26 of 26

```
cout << ptr <<" ";
getch();
return 0;
}</pre>
```
